

Creating thriving habitats for people and wildlife

The next evolution of sustainability

Biodiversity loss threatens ecosystems globally, and we need novel solutions to recreate our wild spaces and assure resource availability. Planting trees and restoring habitats increases biodiversity and secures the future of ecosystem services that are essential to people and wildlife. Our tree planting and biodiversity programmes channel your funding into habitat creation projects, restoring our lost biodiversity.

Why invest with Creating Tomorrow's Forests?

- ▶ Expertise in tree planting and habitat creation with proven track record
- ▶ Certified biodiversity net gains assured for the long-term
- ▶ UK based projects allow you to experience restoration in action
- ▶ Improve your ESG rating, attract investment, and reduce shareholder risk

Why should your business invest?

Transform your sustainability programme, improve your ESG score, and work towards science-based targets for nature by investing in our high quality habitat restoration projects. Our programmes enable you to mitigate your impact on natural resources, and offset your carbon and biodiversity footprints by investing directly in natural capital, aligning with several Sustainable Development Goals.

Educate - Engage - Evolve

Invest in natural capital and restore lost habitat across the UK

**Woodland Regeneration
and Water Meadow**
Devon, UK

**Freshwater Lake and
Wetland Creation**
Dorset, UK

**Seagrass Meadow
Restoration**
Wales, UK

CTF community member benefits:

- ▶ Detailed site progress updates, exclusive webinars, educational blogs
- ▶ Guided site visits so you can see the return on your investment in person
- ▶ Business certificate, CTF marketing pack, and site GPS coordinates

Measuring biodiversity

We are aligned with upcoming biodiversity credit certification schemes, and use traditional surveying, the DEFRA biodiversity metric, and the latest eDNA technology to ensure that our habitat restoration delivers scientifically quantifiable improvements, which will boost your ESG ratings.

We also offer bespoke integrated business solutions, using sales or other business triggers, we can allocate funding to our projects for your clients.
