July 2021 Spotlight on Security & Safety

New Product Release

For security officers patrolling large sites, risks include sudden intruder confrontation and assault, which may result in serious injury. Sending an SOS message is all very well, but for the fastest response, the other safety officers will need to know where you are, especially if you are lying on the ground injured or unconscious.

Scope has a solution. A classic in the making, the Scope **EPOC-BLU** is a rugged, all-weather 2-way Critical Responder with **SOS** and **Man-Down** functionality. But it is more than this, with **Bluetooth** and **GPS** modules on-board, the EPOC-BLU can transmit indoor & outdoor location status.

- ◆ **Indoor location with BLU Beacons, sent when an urgent alert is transmitted, or automatically when a new Beacon is discovered.**
- ◆ **Configuration App allows Beacon range adjustment, ideal for on-site walk test and calibration of each zone.**
- ◆ **GPS function can be enabled Over The Air or by the user.**
- ◆ **For larger sites, use with Scope transponders to extend coverage in outside areas with the GPS function.**
