Assumptions - Average cost of 1 litre of Alcohol Gel is £6 at retail prices (bulk prices could be less). Ezisan fluid is £6 for 1 Litre (depending on volume). *Recommended amount of hand gel for each application is 3ml (World Health Organisation). For this comparison we have used a medium using @1000 applications per week. Savings will vary depending on usage. *Ezisan supplies sanitising fluid in 1 litre bottles that are recyclable. When comparing plastic waste Ezisan saves 83% by using fewer bottles, which also saves shipping costs and reduces individual deliveries. This makes Ezisan more environmentally friendly. * Ezisan requires draining fluid and refilling monthly, this is accounted for.
