OUR EDGE: YEARS OF EXPERIENCE

ONE SERVICE ONE SUPPLIER

Marsh Barton Security Services offer complete security solutions for clients in both the commercial and domestic sectors.

Whether it's security for a commercial building, private residence or electronic system installation, we cannot be beaten on quality and professionalism. We cover the whole security spectrum enabling our clients to receive exactly what they need, from the initial enquiry to the final implementation as well as ongoing maintenance, advice and support. We are military led and therefore provide our services in a military fashion.

WHAT WE DO

Our team provides an unrivalled service every step of the way, from conception to conclusion: we create a trusting partnership on which you can totally rely, with loyalty and confidentiality. No matter in which capacity we are engaged, we can guarantee total dedication to client satisfaction, a goal we consistently achieve through meticulous planning, management, coordination and communication.

OUR PLANET: HOW WE DO OUR BIT

We are currently the only security company to operate a fleet of electric patrol vehicles. With each car having a range of 100 miles of pure electricity, we have plenty of capacity to cover the required area.

REDUCING OUR CARBON FOOTPRINT

With our cars on call 24 hrs a day, our fuel consumption was, understandably, quite high! Our decision to switch to electric vehicles and to purchase our fleet of BMW i3's, meant that we dramatically reduced our own carbon footprint as well as that of our clients. We are proud to have taken a major step in becoming a carbon neutral company and doing our bit for the environment.

OUR SERVICES

At MBSS we specialise in offering a complete security solution for your business, both technically and physically. This sets us apart from many of our competitors as we can be your sole supplier for all your security needs, providing you with both peace of mind and simple management.

Our pricing structure is competitive and flexible with short, medium and long-term contracts available, and we are always happy to arrange a visit to your premises to assess and consider the specific security needs of your business.

TECHNICAL AND PHYSICAL

Whether it's CCTV, Intruder Alarms, Access Control or Security Arches, our technical team have the knowledge and expertise to put together a package to suit you and your budget. We are NSI Gold rated and offer a full, bespoke service that is tailor made to your requirements, and we will also provide maintenance for you post installation.

MBSS will supply Static Guard Security Officers who are on site out-of-hours, Mobile Patrols, Key Holding services and 24hr Alarm Response - our physical response teams have the ability to cover every eventuality. Let us take the worry away by dealing with those middle-of-the-night call-outs on your behalf.

TOMORROW'S TECHNOLOGY, TODAY

CCTV & INTRUDER ALARMS

CCTV has become part of our everyday lives. The reason is clear, CCTV security camera systems are one of the major contributing factors of transferring crime away from your property or business. Four major factors are to be considered before deployment of CCTV or Alarm Systems:

- **Quality of System**
- **Cosmetic Appearance**
- **Record & Playback Ability**
- **Data Access (View from anywhere via mobile or PC).**

Our technical team will discuss and consider all of these with you so we can implement the right solution, based on your needs.

It is an unfortunate fact of life that burglaries happen; however, having visible intruder alarms is proven to reduce the risk of being targeted.

We will provide a bespoke service to meet your business' needs, with our consultants guiding you from survey to installation

All of the systems that we offer are user-friendly and cost-effective, and our latest wireless alarm systems offer high-quality and reliable security solutions with minimal disruption when installing them.

RESPOND & PROTECT

MBSS are a Gold accredited contractor by the Security Industry Authority (SIA). This is for the provision of manned security services, including guard control systems, uniformed mobile and static guards, and keyholding and alarm response services.

Key Holding & Alarm Response

By offering this service, MBSS can offer complete peace of mind as well as saving your business time and money. Key Holding can also include the routine opening and closing of your premises and acceptance of deliveries during out of hours periods.

Security Guards and Mobile Patrols

MBSS pride ourselves on the standards of our Security Officers, the flexible nature of our services and our ability to fulfill all requirements.

You may require a Static Officer 24 hours a day or on a simple short-term basis; you may need nightly internal or external patrol checks to a specific site. MBSS can accommodate you and your business' requirements, whatever they may be.

All of our patrol cars and our guards are fully MBSS branded and will not only be representing our own company, but our clients' as well. With a full SIA license - we hold a Gold award – we work to the highest recognised industry standards as demanded by the Police, Fire service and the Insurance industry.

FULL SOLAR FARM SECURITY SOLUTION AND MONITORING

The demand for renewable energy is on the rise with more and more areas of the country being sold to solar farm projects. When you embark on building a solar farm, you will very quickly recognise that the list of suppliers gets longer and longer. Security requirements alone could involve three or four different suppliers.

With MBSS you can rely on one extremely professional and experienced team to provide:

- Security consultancy
- Manned guarding
- Asset protection and control
- Perimeter fencing
- CCTV, sensors and remote speakers
- Remote 24/7 monitoring

Whatever your security requirements, call us today.
