

TRUE NO TOUCH OPERATION

“An award winning hand and small item sanitizer,
making the workplace a safer place
in our modern world”

“Reduce staff sickness from cross contamination from shared items such as keys, mobile phones, and other communal small office items”

PROTECTS STAFF & CUSTOMERS

“No cross contamination as the system Automatically activates when hands or items are placed in the ezisan”

“Suitable for prestigious Locations like hotel lobby's and restaurants. The EZISAN is can be sited where Its needed unlike messy gel and fluid systems”

“Makes for a much safer sanitizing station area and reduces slippery floor risk occurrences”

“Faster operation makes the Ezisan much quicker to use and at a lower operational cost”

“Low Voltage operation from either rechargeable batteries or a Plug in transformer and suits all ages and abilities”

*“ Our Sanitizer Fluid is very powerful
yet kind to the hands unlike some
gels and alcohol based liquids”*

 **MADE IN
BRITAIN**

NO MORE WET HANDS

*“Service & Support from a developing
network Of distributors and agents”*

“The Ezisan system has many models and configurations for most applications”

SILENT AND SAFE

“The sanitizing fluid is simply topped up by the customer as and when required. The rate of consumption is significantly lower than traditional gel and liquid dispensers and offers no irritation to most users even during repeated use in locations such as gymnasiums”

“The Ezisan system offers employers a method of safely enticing staff back to work and ensuring a safe workplace ”

“The Ezisan System when installed correctly will reduce staff absence due to sickness, cross contamination, viral infections etc indeed the system is considered a front line tool to reduce staff absences and help maintain company performance. These are often accepted as normal HR staffing costs, but now Ezisan changes everything.
